

Stem Cells Made Simple Recap & FAQs

So, let's do a quick recap of what we discussed so far:

You were created as a masterpiece (healing and regeneration are encoded in your DNA).

Stem cells are the wave of the future and the future is here and now.

All the experts believe that Stem Cell Therapy is the future of medicine, but remember: it's personal because stem cells are the future of *your* personal health and longevity.

The problem is degeneration (i.e., inflammation causes sickness, disease, pain, and aging).

The solution is regeneration (i.e., to build, grow, and create new tissue).

Stem cells decline rapidly as we age, leaving us more susceptible to illness, disease, and accelerated aging.

Stem cells are now available and are simple, safe, convenient, effective, affordable, and produce amazing results.

Stem cells are your body's internal repair system.

Of the five types of stem cells, the most effective and beneficial are human umbilical cord stem cells.

The science and research are undeniable and progressing rapidly.

The rest of your life will be the best of your life.

Are stem cells FDA approved?

The labs are regulated by and registered with the FDA. Stem Cell Therapy is a natural therapy and natural therapies are not approved by the FDA. The entire process is handled within the United States.

How long does the therapy take?

Only a few minutes.

How many therapies do I need?

Each patient varies. According to research, most people respond very well to one therapy. Other patients benefit from a second therapy three to six months later. Some patients choose to schedule regular therapy to help the body maintain good health. Research indicates that stem cells reproduce every twenty-eight hours for about sixty-five generations. That means that you can expect to see the regenerative effects up to six months - while the benefits can last a lifetime.

Are there any potential side effects?

Possible mild temporary discomfort or bruising at the injection site. One to two percent of patients experience mild flu-like symptoms.

How fast will I see results?

Patient responses vary. Anti-inflammatory results can be immediate or within a few days. Regenerative effects are typically first seen in four to six weeks. Remember, regeneration takes time.

Are there guarantees that the area that I want to regenerate will undergo the regeneration?

No. The stem cells do not speak the language of disease and we cannot tell them where to go and what to do. Instead, the body uses a process referred to as paracrine signaling to call the stem cells to injured or damaged areas. The body will prioritize the regenerative process by repairing vital organs such as the heart and lungs first. Many people experience benefits that they did not expect, such as, better vision, stabilization of blood sugar levels, and more.

Who is a candidate for Stem Cell Therapy?

Anyone who is trying to keep their body functioning optimally should consider a consultation to discuss their personal situation and needs.

Is the therapy safe?

Yes. The cells are tested for your safety and complete sterility is validated and maintained throughout the entire process. All regulatory guidelines are met or exceeded.

In accordance with the FTC guidelines concerning the use of endorsements and testimonials in advertising, please be aware of the following. Federal regulations require us to advise you that all reviews, testimonials, and/or endorsements of any kind reflect the personal experience of those individuals who have expressed their own personal opinions, and those opinions and experiences may not be representative of what every consumer may personally experience with the endorsement. All reviews and testimonials are the sole opinions, findings, and/or experiences of the people sharing their stories. The people are not compensated in any way.

These statements have not been evaluated by the US Food and Drug Administration (FDA). We are required to inform you that there is no intention—implied or otherwise—that represents or infers that these statements be used in the cure, diagnosis, mitigation, treatment, and/or prevention of any disease. These testimonials do not imply that similar results would or could happen for you. These testimonials are not intended to diagnose specific illnesses or conditions or be a treatment to eliminate diseases or other medical conditions or complications. We make no medical claims as to the benefits of anything to improve medical conditions.
